

DISC Stakka®

“The Imation Disc

Stakka CD and DVD

Manager has made life

so much easier. It will

prevent any discs

being lost and can

grow with us as we

continue to add to it.”

Jane Holt,
Administration Officer,
INNOVIC

INNOVIC Impressed by Innovative Disc Stakka

When **INNOVIC** (Victorian Innovation Centre Limited) recently installed a computer backup system, it selected the Imation Disc Stakka to safely store its CDs and DVDs.

After less than a week's use, INNOVIC realised how much more valuable the Disc Stakka and its accompanying OpdiTracker software would become to the organisation.

When **Jane Holt**, INNOVIC's Administration Officer, started loading backup discs into the carousel, she immediately saw the benefit in also adding their library of archived music CDs and artwork, operating software, client files and other important business data.

“This isn't just a unit to store discs,” said Jane. “OpdiTracker automatically catalogues each disc I place in my DVD drive. I can also add comments and images, and the intuitive search engine lets me quickly locate any disc or file stored in the OpdiTracker database.”

INNOVIC is an independent not-for-profit organisation. It provides a range of services to educate and assist early stage innovators and small businesses, and helps develop and commercialise viable new products and technologies. Its activities are supported by the Victorian State Government under the VicStart program.

INNOVIC's services are used by over 1600 innovators every year and conservative estimates indicate that the businesses it assists generate more than \$14 million a year.

Locating the discs to go into INNOVIC's new Disc Stakka was an exercise that highlighted how much a system like this was needed.

“Our discs were all over the place,” said Jane. “Everyone had their own method of filing: in boxes, in drawers, in cupboards, on shelves. I often spent considerable time finding a particular file, having to search the contents of multiple discs before I found the right one.

“The other day we needed the MYOB disc to upgrade our MYOB bookkeeping system. It took two of us half an hour to find the right one. That is wasted time, which fortunately won't happen again now that we're using Disc Stakka.”

Finding files and folders fast!

To retrieve a file, folder, photo, piece of music, image or any other content required from a disc in the Disc Stakka, simply enter keywords into OpdiTracker's Search, and it finds the file in seconds.

Double-clicking the file ejects the disc on which it is stored. There is no need to remember where discs are located.

INNOVIC's new backup system and Disc Stakka came to the rescue only two weeks after it was installed.

“Someone accidentally erased an important client file from the server,” said Jane. “They came to me and asked if I could retrieve it from a backup disc. I knew it would be on the last backup disc, and to their relief I was able to produce the file they needed in a matter of seconds.”

“We are now in the process of implementing a new client management system and once this is in, all our data will be online, so backups will become even more important,” she said.

“It is fantastic. Coming from an IT background, I wish I could have had the Disc Stakka in my previous positions where I had many more discs to manage.”

www.discstakka.com

- ▼ *Each compact Imation Disc Stakka unit holds up to one hundred 12 cm discs.*
- ▼ *The bundled OpdiTracker software automatically catalogues in its database the volume, file and folder names from computer-readable CDs and DVDs.*
- ▼ *Search by name or keyword to find any file, folder or disc within seconds, and then instantly eject the required disc.*
- ▼ *Single USB connection for both power and data.*
- ▼ *Stack units five high to store 500 discs without needing additional cables or desk space.*
